Profile

Passionate software developer with a strong focus on building clean, efficient, and scalable applications. Skilled in solving complex problems, learning new technologies quickly, and delivering user-friendly solutions. I recently completed my Computer Science diploma at Abubakar Tafawa Balewa University, Bauchi, Nigeria. I'm open to remote roles and internship opportunities where I can contribute to real-world projects, grow my backend and full-stack expertise, and collaborate with teams to build impactful products.

Education

Diploma in computer science
Abubakar Tafawa Balewa University

2023 – 2025
Bauchi, Nigeria

Projects

Bulus-dev portfolio V1

This is my personal portfolio website, designed to showcase my skills, projects, and experience as a developer. It includes an 'About Me' section where I share details about my background, education, and journey as a developer.

FewerCharacters

A web app leveraging serverless functions and the OpenAI API to generate concise text summaries. Built with HTML, CSS, and JavaScript, with server-side logic handled through serverless architecture.

Siwel Beat Beat E-Commerce & Music Streaming Platform

Built the backend for SwillBeatz, a beat-selling and audio-streaming platform using Node.js (TypeScript), MongoDB, and Supabase. The system supports listing and purchasing beats, audio streaming for previews, and is designed for future Stripe payment integration. Currently finalizing backend features before starting the React.js frontend.

Task Manager App

A task management tool using IndexedDB for storage, Chart.js for data visualization, and a Vanilla Calendar library for scheduling.

Svg-Projects-Card

Svg-Projects-Card is an API that generates SVG visualizations of GitHub repositories for embedding in websites and README profiles. Built while learning Flask, it supports different themes and an imageUrl parameter for project cover images.

Professional Experience

Exponential Enlightenment

Full-Stack Developer (Remote)

2024 – Present
Remote

Developing and maintaining web applications as the sole full-stack developer for a startup. Responsible for building frontend interfaces, implementing backend APIs, adding features such as authentication and dashboards, and managing ongoing product improvements.

Personal Projects

2022 – Present

Backend / Full-Stack Developer

Nigeria

Built multiple full-stack web applications using Node.js, TypeScript, MongoDB, and Supabase. Developed backend APIs, authentication systems, and streaming endpoints, while planning frontend interfaces with React.

Skills

Languages & Frameworks — HTML5, CSS3, JavaScript (ES6+), React.js, Python, Tailwind CSS, Node.js and Flask.
✉ k.py.

Technologies & Tools — Git & GitHub, Supabase, MongoDB, IndexedDB, Figma.
